

## Exercise 5

Enclosed you can find a xml file with the calendar of namesdays in several countries. Add there names for your country. Then, prepare the webpage where you will display

- what names corresponds to the day that is today.
- what date corresponds to the entered name. The name can be entered without accents. Small letters and capitals can be mixed according to preferences of the web page user.

The layout of the web page should be designed only using CSS styles that will be defined in one external CSS file.
