Exercise 3

Create the webpage with own meaningful form. It should meet the following requirements:

1. The form must contain at least:
   - 2 text fields
   - textarea
   - checkbox
   - radio buttons
   - combobox
   - hidden text field to enter your name.

2. At least 2 items in the form has to be interlinked (e.g. items of the second drop-down list will depend on the selection of the item in the first drop-down list or some part of the form will be displayed only after checking a checkbox).

3. Use regular expressions for checking the content of following fields:
   - the textarea has to contain some text
   - one text field has to contain an email address, which will include at at least 2 domains, whereby the top domain can have 2-4 characters. At least 3 characters must be before „at" sign.
   - one text field has to contain the date. It must be a meaningful date including leap years. The individual parts of the date (day, month, year) are separated by a dot, and single-digit day and month can not be written with zero at the beginning. You can use help of JavaScript for reaching this functionality.

4. The layout of the web page should be designed only using CSS styles that will be defined in one external CSS file.

5. The content of the form has to be send to email address katarina.zakova@stuba.sk either using mailto method or using some free internet service, respectively.
